

LUBRICATION OIL TESTING EQUIPMENT

Lubrication Oil Testing Equipment

Maintaining the integrity, performance, and safety of lubricating oils is critical across automotive, industrial, and petrochemical sectors. Our comprehensive range of Lube Oils Testing Equipment is engineered to provide precise, repeatable, and industry-compliant analysis for both used and unused lubricating oils. From evaluating viscosity and flash points to determining wear protection and elemental composition, these state-of-the-art laboratory instruments are designed to meet rigorous international standards (including ASTM, ISO, and IP). Built for accuracy and durability, our equipment ensures that your quality control and research facilities can accurately predict oil lifespan, prevent mechanical failures, and optimize formulation characteristics.

Application

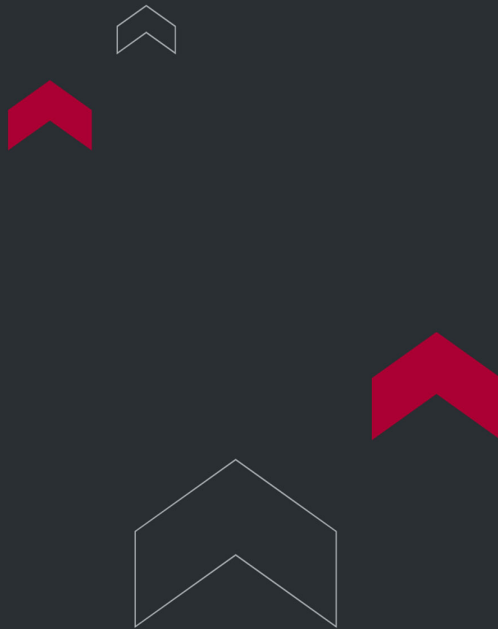

Lube Oils Testing Equipment is essential for a wide array of industrial and laboratory applications, including:

- **Quality Control & Formulation:** Verifying the physical and chemical properties of newly formulated engine oils, gear lubricants, and hydraulic fluids before they reach the market.
- **Predictive Maintenance (Condition Monitoring):** Analyzing used oils from heavy machinery, fleet vehicles, and manufacturing plants to detect early signs of engine wear, contamination, and oxidation.
- **Petrochemical Refineries:** Ensuring continuous batch quality and compliance with regulatory standards during the refining process.
- **Research & Development:** Assisting researchers in developing advanced, high-performance synthetic and semi-synthetic polymer-containing fluids that withstand extreme temperatures and shear forces.
- **Tribology Testing:** Evaluating friction, wear prevention, and load-carrying capacities to extend the service life of gears and oscillating bearings.

Why choose Torontech series for your Lubrication Oil Testing Equipment?

When outfitting your laboratory, precision and reliability are non-negotiable. The Torontech series is the premier choice for your lube oils testing because it merges advanced automation with robust, cost-effective engineering. Our instruments are

designed to streamline complex testing protocols—reducing human error and minimizing operator time through fully automated, user-friendly interfaces. Furthermore, every unit in the Torontech series guarantees strict compliance with the latest global ASTM and ISO test methods, ensuring your lab produces highly accurate, audit-ready data. Supported by our deep expertise in retail laboratory equipment and dedicated technical service, investing in the Torontech series means investing in long-term operational efficiency and uncompromised product quality.

Torontech Inc.

251 Consumers Road, Suite 1200
Toronto, Ontario, M2J 4R3, Canada
