

LABORATORY SIEVE SHAKERS

Torontech's Laboratory Sieve Shakers are engineered to deliver accurate, reproducible particle size distribution analysis for quality control and research. Whether testing fine powders in pharmaceuticals or coarse aggregates in construction, our automated sieving systems ensure compliance with international standards (ASTM, ISO, USP).

Eliminating the variability of manual sieving, these instruments provide consistent mechanical motion to separate dry, wet, or distinct sample fractions efficiently. Our range covers everything from heavy-duty electromagnetic units to advanced air-jet technology for ultra-fine materials.
