

REFRIGERATED CIRCULATOR AND CHILLER TT-RHCL6-05

Refrigerated Circulator and Chiller TT-RHCL6-05 is versatile, finding applications in oil, physical and chemical sciences, pharmaceuticals, environmental protection, and various scientific domains requiring precise temperature control.

APPLICATIONS

Refrigerated Circulator and Chiller TT-RHCL6-05 applications include experiments requiring heating and cooling, as well as use in fermentation tanks, polarimeters, refractometers, spectrophotometers, electrophoresis systems, chromatographic columns, viscometers, rotary evaporation instruments, and rheometers.

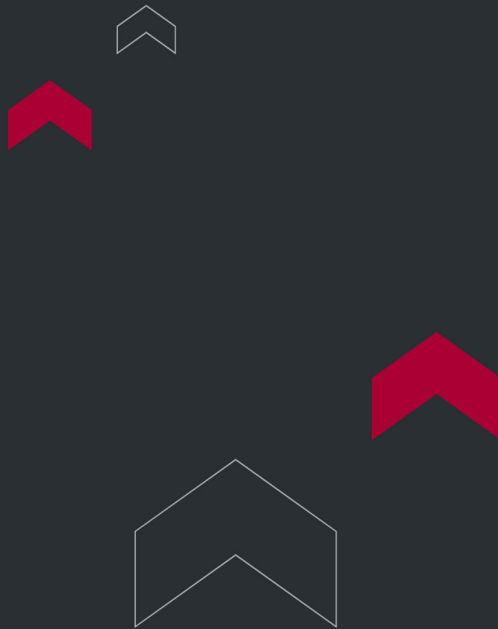

FEATURES

- Convenience features: Parameter memory function and temperature correction.
- The cooling system is made eco-friendly and powerful with an ECO-refrigerant R134a and a high-quality compressor.
- Designed for low noise: Utilizes a high-quality compressor and a silent pump.
- Sturdy water tank: Resistant to ultra-sludging and rust, ensuring durability.
- Clear and bright LCD temperature display.
- Compact design with a detachable venting grid for easy cleaning, ensuring optimal cooling performance and efficient water drainage.

TECHNICAL SPECIFICATIONS
