

POWDER METALLURGY DENSITY TESTER

Powder Metallurgy Density Tester - Density Meter | Densimeter | Specific Gravity Tester

Powder Metallurgy Density Testers are equipped with advanced features to accurately measure density in powder metallurgy applications.

Powder Metallurgy Density Testers adheres to ASTM B962, B311, B328, MPIF STM 42, STM 57, and ISO 2738:1999 standards. It uses the Archimedes principle buoyancy method, utilizing the boiling water method, immersion method, and vacuum-saturated waterproof treatment to directly display bulk density and porosity data.
