

ADVANCED HOSPITAL & MEDICAL BEDS

Engineered for Patient Comfort, Caregiver Efficiency & Clinical Safety

Advanced Hospital & Medical Beds form the foundation of modern patient care — supporting recovery, dignity, and clinical workflow across every department of a hospital, from general wards to high-acuity ICU and CCU environments. A modern hospital bed is no longer just a place to rest; it is a sophisticated clinical platform integrating electric height and posture adjustment, emergency CPR functionality, fall-prevention safeguards, in-bed imaging capability, weight monitoring, pressure-ulcer prevention, and infection-control engineering — all designed to elevate patient outcomes while reducing caregiver workload.

Torontech proudly presents the ToronCare™ Series — a comprehensive line of advanced hospital and medical beds engineered to meet the needs of healthcare facilities worldwide. The series spans manual three-function beds (ToronCare™ 1010) for general ward and long-term care, mid-range and premium electric hospital beds (ToronCare™ 1040, 1050, 1060, 1065) for hospital wards and post-surgical recovery, and full-featured ICU/CCU electric beds (ToronCare™ 1061, 1070, 1076, 1078) with multifunction electric positioning, central nurse control, quick-release CPR, integrated weighing scales, X-ray translucent backboards with sliding cassette holders, touchscreen interfaces, automatic compound fallback for pressure-ulcer prevention, and bed-exit alarm systems. Every ToronCare™ bed is engineered with infection-control-friendly construction — electro-coated steel frames, removable mattress platforms for sterilization, flat joint-free surfaces, and detachable PP head/foot boards — ensuring durability, hygiene, and long service life across the most demanding healthcare environments.

Elevate Every Moment of Patient Care

In every hospital, every clinic, every recovery room — the bed is the place where patients spend most of their healing journey. The right bed protects them from falls, prevents pressure ulcers, supports their breathing and circulation, enables life-saving interventions, and gives caregivers the tools they need to deliver outstanding care. The wrong bed creates risk,

inefficiency, and avoidable complications. The healthcare facilities that consistently deliver world-class outcomes are the ones equipped with hospital beds engineered for patient comfort, caregiver workflow, and clinical safety — and the Torontech ToronCare™ Series gives you exactly that.

Whether you are equipping a new hospital, upgrading a critical-care unit, expanding a rehabilitation facility, or supporting home-healthcare patients, Torontech has the bed platform engineered to meet your exact needs. From the dependable manual ToronCare™ 1010 to the fully-featured ICU ToronCare™ 1076, 1070, and 1078, every Torontech bed is built to deliver world-class performance backed by industry-leading service and support.

APPLICATIONS

Applications in Healthcare Settings

- **Intensive Care Units (ICU) & Critical Care (CCU)** — Multifunction electric positioning, central nurse control, quick CPR release, Trendelenburg/reverse-Trendelenburg, cardiac chair function, and integrated weighing scales for continuous monitoring of critically ill patients.
- **Post-Surgical Recovery & Step-Down Units** — Smooth simultaneous back-rest and leg-rest adjustment, automatic compound fallback to reduce pelvic/sacral pressure, and patient-side controls for early-recovery comfort and independence.
- **Emergency Departments & Trauma Care** — Backup-battery operation, quick-release CPR levers, reset-to-flat positioning, and electric central braking for rapid response in emergency and trauma situations.
- **Cardiac & Respiratory Wards** — Cardiac chair positioning to optimize lung ventilation and heart function; bedside imaging capability for ARDS and respiratory monitoring.
- **Diagnostic & Imaging Support** — X-ray translucent backboards with side-access sliding cassette holders enable in-bed radiography and C-arm interventions without moving the patient — protecting fragile and post-operative patients from unnecessary transfers.

- **General Hospital Wards & Long-Term Care** — Full-length protective side rails, bed extension for taller patients, bed-exit alarms, angle indicators, and durable construction for reliable everyday use across long patient stays.
- **Rehabilitation Centers & Geriatric Facilities** — Adjustable positioning supports mobility, therapy, and patient independence; fall-prevention engineering reduces injury risk for elderly and recovering patients.
- **Home Healthcare, Nursing & Assisted Living** — Professional-grade manual and electric models (such as the ToronCare™ 1010) deliver hospital-level functionality in home and residential-care environments.

FEATURES

Why Choose Torontech for Your Hospital Bed Needs

With more than two decades of experience supplying advanced medical and analytical equipment to healthcare facilities across more than 60 countries, Torontech has earned a global reputation as a trusted partner for hospital bed solutions. Choosing the ToronCare™ Series means partnering with an organization committed to elevating patient care, caregiver efficiency, and clinical safety.

Comprehensive Single-Source Bed Portfolio

From manual three-function ward beds to full-featured ICU electric beds with integrated weighing scales and touchscreen controls, Torontech offers one of the broadest hospital-bed portfolios available — simplifying procurement, training, and service across every department, from general wards to high-acuity critical care.

Patient Safety Built In

Every ToronCare™ bed integrates comprehensive safety features: full-length or split protective side rails, gas-spring-controlled drop-down railings, bed-exit alarm systems, angle indicators, central electric braking, automatic compound fallback to reduce pressure-ulcer risk, backup-battery operation, and one-key quick-release CPR — protecting patients in every scenario, including power failures and clinical emergencies.

Infection Control & Hygiene Engineering

Every bed is engineered for the demanding hygiene standards of modern healthcare — flat, joint-free surfaces, electro-coated and powder-coated steel frames with corrosion-resistant finish, removable mattress platforms for full sterilization, and detachable PP head/foot boards for thorough cleaning between patients.

Clinical Integration & Smart Features

Advanced ToronCare™ models integrate X-ray translucent backboards with adjustable cassette holders, 10.2-inch touchscreens with patient lock-out, central nurse control panels, patient-side controls in the side rails, integrated weighing scales, programmable memory of bed positions, and C-arm compatibility for bedside interventions — turning every bed into a true clinical workstation.

Cost-Effective Value & Global Support

Torontech delivers premium hospital-bed quality at a transparent, competitive price point — without the inflated cost structures of legacy brands. With offices and authorized partners across the USA, Canada, UAE, KSA, GCC, EU, India, APAC, Africa, and Latin America, expert installation, staff training, and ongoing service are always within reach.
