MEDICAL CART (DOUBLE)

Medical Cart (Double) - ToronCAB™ 1150

ToronCAB™ 1150 double medical record cart gives hospital wards twice the chart storage of a single-bay unit, holding patient files upright across two lockable compartments. Each bay uses vertical dividers that keep charts and binders organized and easy to pull during rounds. Two top drawers, secured by cam locks, store stationery and small items above each storage column. A stainless steel push handle and four braking swivel casters let staff move the loaded cart and park it firmly at the point of care.

Busy wards and shared nursing stations use the ToronCAB™ 1150 when one cart needs to serve more patients or two staff members at once. Roll-down shutter doors close over both bays and lock with cam locks, keeping records covered and secured whenever the cart sits in a corridor. The compact L730 by W400 mm footprint still moves through standard doorways despite the higher capacity. A rigid frame keeps the cart easy to push even when fully loaded with charts.

For North American facilities, the cart's cam-locked drawers and shutter doors help keep protected health information secured between uses, supporting HIPAA-aligned handling at the bedside and in shared spaces. The two-column layout lets a unit manage charts for a larger patient group from a single mobile point, reducing trips to a central records room. Designed for daily clinical use, the ToronCAB™ 1150 keeps a high volume of patient files mobile, organized, and access-controlled across wards, clinics, and care units.

APPLICATIONS

Medical Cart (Double) - ToronCAB™ 1150 Applications

The ToronCAB™ 1150 suits departments that manage a higher volume of patient records and need them mobile and secured. Its two-bay capacity fits busy and shared clinical settings.

- Large Hospital Wards: stores charts for more beds in a single cart, so staff cover a bigger patient group without returning to a central records desk.
- Shared Nursing Stations: lets two staff members work from separate bays at once, or consolidates records for a combined patient list at one mobile point.
- Intensive Care and High-Dependency Units: keeps extensive monitoring charts and care plans organized across two compartments in areas that generate heavy documentation.
- Outpatient and Day-Surgery Clinics: moves patient files between consultation and procedure rooms with capacity for back-to-back caseloads.
- Operating Room Suites: holds surgical records and checklists for multiple cases while shutter doors and cam locks secure paperwork between procedures.
- Long-Term Care and Rehabilitation Facilities: organizes resident records for daily routines and keeps files access-controlled in shared, high-traffic environments.
- Medical Records and Administration Departments: transports and stores larger batches of chart binders during audits, filing, and archival work.

FEATURES

Medical Cart (Double) - ToronCAB™ 1150 Key Features

The ToronCAB™ 1150 pairs high-capacity, two-bay storage with secure locking and easy mobility in a compact double medical record cart.

- Two-Bay Double Storage: two separate columns of vertical dividers roughly double chart capacity, so one cart covers more patients or two workflows.
- Roll-Down Shutter Doors: each bay closes behind its own shutter, hiding records from view and keeping files protected between uses.
- Dual Cam-Locked Drawers: two top drawers, each secured by a cam lock, organize stationery and small items above the storage columns.
- Independent Cam-Lock Security: keyed cam locks on the shutters and drawers help facilities keep patient records access-controlled and support HIPAA-aligned handling.
- Stainless Steel Push Handle: a dedicated handle gives staff a firm grip and better control when steering a fully loaded cart.
- Four Individual-Brake Casters: each swivel caster locks on its own for a stable base at the bedside and rolls freely between rooms.
- Compact Footprint: the L730 by W400 mm base moves through standard doorways despite the added storage capacity.

THEORY & METHOD

Theory and Method

The ToronCAB™ 1150 doubles capacity by running two independent storage columns side by side rather than widening a single bay. Vertical dividers in each column hold one chart binder or clipboard per slot, with file spines facing outward so staff read and select records at a glance. Splitting storage into two columns lets one cart serve two workflows at once, or keep two patient groups physically separated. Even divider spacing distributes the load and holds files upright while the cart moves.

Security on this model works through roll-down shutter doors and a set of cam locks rather than open shelving alone. Each shutter pulls down over its storage column and locks, hiding records from view and restricting access while the cart sits unattended. Cam locks also secure the two top drawers, so stationery and small items stay contained. Because the locks work independently of the wheel brakes, an operator parks the cart and closes it down in separate, quick steps.

Mobility comes from four swivel casters, each with its own brake, paired with a stainless steel push handle. The dedicated handle gives the operator a firm grip and good leverage to steer a heavier, fully loaded cart with control. Locking all four casters creates a stable base when staff work at the cart, while releasing them allows free movement in any direction. This combination of a fixed handle and independent braking matches the higher weight a double-bay cart carries when both columns are full.

TECHNICAL SPECIFICATIONS

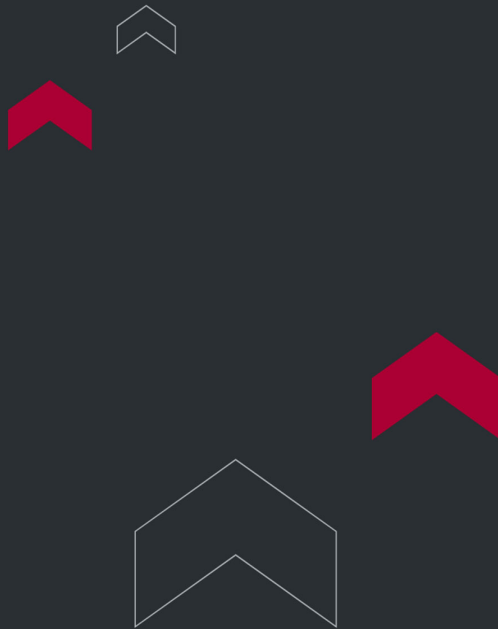

Medical Cart (Double) - ToronCAB™ 1150 Technical Specifications

Parameter	Specification
External Dimensions	L730 × W400 × H1040 mm (±10 mm)
Configuration	Double bay (two storage columns)
Record Storage	Vertical divider slots for chart binders and clipboards
Access	Roll-down shutter door over each bay

Parameter	Specification
Mobility	Four swivel casters, each with individual brake

Standard Configuration

Item	Quantity	Description
Drawer	2 pcs	Lockable top drawers, one above each storage bay
Cam Lock	2 pcs	Keyed locks securing the shutter doors and drawers
Stainless Steel Handle	1 pc	Push handle for steering the loaded cart
Individual Brake Caster	4 pcs	Swivel casters, each with a dedicated brake for stable positioning
