

LINEN CART

Linen Cart - ToronCAB™ 1700

ToronCAB™ 1700 is a stainless steel soiled linen cart for collecting and moving used linens or general waste around a hospital or clinic. A large fabric bag hangs in a stainless steel frame and holds a full load of soiled items, with a cover that keeps the contents enclosed. The bag lifts out for emptying and washing, so the cart stays clean between uses. Four swivel casters, two with brakes, and push handles at each end move the cart and hold it steady.

Hospitals, clinics, and care homes use the Torontech ToronCAB™ 1700 to gather soiled linens and waste during bed changes, cleaning rounds, and laundry collection. Staff drop used items straight into the bag as they work, then wheel a full load to the laundry or disposal point in one trip. The stainless steel frame resists corrosion and tolerates regular cleaning, and the cart ships in knock-down form to lower freight cost. The compact 805 by 530 mm footprint moves easily through corridors and doorways.

APPLICATIONS

Linen Cart - ToronCAB™ 1700 Applications

The ToronCAB™ 1700 suits any setting that needs to collect and move soiled linens or waste in volume. Its single-bag design fits a range of hospital and facility tasks.

- Hospital Wards: collects used bed linens and gowns during bed changes and rounds.
- Housekeeping and Cleaning Rounds: gathers general waste and soiled items while staff clean rooms.
- Laundry Collection: transports soiled linens from wards to the laundry in one load.
- Operating Rooms and Recovery: removes used drapes, gowns, and linens during turnover between cases.
- Care Homes and Rehabilitation Facilities: supports routine linen changes and waste collection.
- Outpatient Clinics: collects soiled materials and waste between patients.

FEATURES

Linen Cart - ToronCAB™ 1700 Key Features

The ToronCAB™ 1700 combines a large covered bag, a durable stainless frame, and easy mobility in a simple soiled linen cart.

- Large Fabric Waste Bag: a single oxford cloth bag holds a full load of soiled linens or waste and lifts out for emptying and washing.
- Covered Bag Opening: a cover folds over the top to contain contents and reduce odor during transport.
- Stainless Steel Frame: a corrosion-resistant frame supports the loaded bag and wipes down for regular cleaning.
- Dual Push Handles: handles at each end let staff steer the cart from either side.
- Four Swivel Casters with Brakes: four casters roll smoothly over hospital floors, and two with brakes hold the cart steady when parked.
- Knock-Down Construction: the cart ships flat to lower freight cost and assembles on site without special tools.

THEORY & METHOD

Theory and Method

The ToronCAB™ 1700 keeps soiled-item collection simple by holding one large bag open and ready in a stable frame. Staff drop used linens or waste straight into the bag as they work, so items leave the room immediately rather than piling up. A cover folds over the top to contain the contents and reduce odor while the cart moves. When the bag is full, it lifts out of the frame for emptying and washing, then drops back in for the next round.

Construction keeps the cart durable and easy to handle. A stainless steel frame supports the loaded bag, resists corrosion, and wipes down for regular cleaning. Four swivel casters carry the cart over hospital floors, with brakes on two to hold it steady during loading, and push handles at each end let staff steer it from either side. The frame ships in knock-down form, which packs flat to cut freight cost and assembles on site.

TECHNICAL SPECIFICATIONS

Linen Cart - ToronCAB™ 1700 Technical Specifications

Parameter	Specification
External Dimensions	805 (L) × 530 (W) × 905 (H) mm
Frame	Stainless steel
Bag	One covered oxford cloth (fabric) waste bag, removable
Handle	Push handle at each end
Casters	Four swivel; two with brakes
Construction	Knock-down (flat-pack)
Packing Size	810 × 660 × 260 mm (2 pcs/carton)
